Work Experience

DataArt — *Full-Stack Developer* (11/2022 – Present)

- **Project:** Large-scale Business Travel Management platform for a US-based client.
- **Stack:** C#, .NET Core Web API, .NET Framework, NUnit, XUnit, , React, TypeScript, JavaScript, MSSQL Server, Azure, Docker, GitHub Copilot.
- **Key Activities & Achievements:**
 - Successfully migrated legacy frontend architecture from **Angular 1.5 to React 18**, significantly improving application performance and maintainability.
 - Spearheaded the migration of **Sabre API endpoints** for train reservation modules.
 - Architected and developed scalable backend features using ASP.NET Core, collaborating directly with US stakeholders to refine product requirements and distribute tasks.
 - Conducted rigorous code reviews, championed refactoring practices, and facilitated technical alignment across the end-to-end PR process.
 - Performed comprehensive unit and integration testing to ensure high-quality delivery, and authored technical support documentation for internal and external use.

Parser Digital — *Full-Stack Developer* (11/2020 – 11/2022)

- **Project 1:** Healthcare Platform (UK-based client)
 - **Stack:** C#, .NET Core, React, TypeScript, NUnit, XUnit, MySQL, AWS (SQS, CloudSearch, CloudWatch, EC2, Route53), Azure DevOps.
 - **Key Activities & Achievements:**
 - Developed new features and resolved critical system bugs for a highly regulated healthcare environment.
 - Successfully integrated Google Sign-In authentication and designed a robust subscription management system.
 - Integrated multiple third-party APIs including **Chargify**, **CQC**, **NumVerify**, and **Fountain**.
 - Managed automated CI/CD deployment pipelines using Azure DevOps and leveraged AWS cloud infrastructure for scaling.
- **Project 2:** Food Delivery App (South America-based client)
 - **Stack:** JavaScript, REST APIs, MySQL, PostgreSQL, Kafka, AWS (S3, SQS), Docker.
 - **Key Activities & Achievements:**
 - Functioned as a Backend Developer focused entirely on application scalability, message queuing, and data stream performance.

SOUTHWORKS — *Software Developer* (08/2018 – 11/2020)

- **Client Portfolio:** Multiple fast-paced US-based clients under Agile/Kanban frameworks.
- **Stack:** Node.js, TypeScript, JavaScript, Jest, TDD, AWS (S3, SQS), Azure, NoSQL.
- **Key Activities & Achievements:**
 - Designed and developed a multi-cloud serverless solution focusing on high availability and horizontal scalability using Node.js.
 - Implemented strict Test-Driven Development (TDD) methodologies utilizing Jest for comprehensive test coverage.
 - Built an automated cloud security tool that triggered open-source antivirus scans on files uploaded to AWS S3 buckets using SQS and JavaScript.
 - Gained extensive, hands-on production experience in Microservices architectures and NoSQL databases across both AWS and Azure ecosystems.

Hexacta — *Intermediate Software Developer* (05/2017 – 08/2018)

- **Client Portfolio:** Web applications for a French enterprise firm.
- **Stack:** C#, ASP.NET, MVC Pattern, SQL Server, Git.
- **Key Activities & Achievements:**
 - Maintained and optimized core corporate web platforms, ensuring high uptime and fixing critical production bugs.
 - Designed and implemented custom features on top of legacy architectures using ASP.NET (C#).
 - Participated in team code reviews and aligned development tasks with client specifications.

Accenture — *Junior Software Developer* (03/2010 – 03/2016)

- **Client Portfolio:** Multi-project environments across various corporate industries.
- **Stack:** .NET WebForms, Angular, C#, Cobol, CSS, HTML, MVC Pattern, Git.
- **Key Activities & Achievements:**
 - Started professional career delivering software solutions across diverse technical environments and enterprise clients.
 - Contributed to the development and maintenance of legacy web apps using .NET WebForms, C#, and newer frontend features using Angular.
 - Gained foundational experience working within structured Agile methodologies and collaborative version control (Git).

Education

Universidad de Palermo

Bachelor of information technologies – 2021

Universidad Tecnológica Nacional

Senior technician in computer systems - 2015
